# ABOUT US

Deep inside the heart of Fairmount Avenue’s business district, Cyber Cafe is in the perfect location to serve its community. Upon first moving to Jamestown in 2017, founder Jack Kane saw an opportunity to fill a hole in the market, a quiet spot for people to be able to work for hours on end. Unlike the various fast food restaurants nearby, he wanted to create a place that only served healthy food and drinks at affordable prices. Opening for business in July of 2017, Cyber Cafe quickly became a favorite hang out spot for the locals.

The original menu only had the most basic options of hot/iced teas and coffees, along with a few baked goods. Over time, the menu has been expanded over the years to include more options. The beverage choices now include specialty coffees, smoothies, frappes, and soda. The bakery choices now include both deserts and breakfast items. In December of 2018, due to popular demand, a new section was added to the menu. For those who want something a little heavier to eat instead of small snacks, we now offer paninis, salads, and soups.

Our number one focus is on sustainability and serving the finest food around. That’s why we use local sources for everything, in order to give back to our community as much as possible. All of our food is made from scratch daily, to ensure it is fresh. We’ve also taken steps to make our cafe environmentally friendly.

So stop by and stay for a while, you won’t regret it!

Open: Sun-Sat  
731 Fairmount Ave
